XLVI STH 9

The STH 9 is a machine with limited dimensions, yet it does not lose sight of the professionalism that characterizes our products. **Equipped with double boiler technology**, along with high level electronics, it allows to adjust the temperature, **an extraordinary thermal stability and energy efficiency.**

The materials used are the best on the market, with the same solidity and reliability as the ones used for **our professional products.**

KEY FEATURES:

- Full stainless steel chassis
- Insulated stainless steel boiler 3 Lt
- Saturated group 7,5 kg
- Latest generation P.I.D system
- Internal rotation pump 150 liters / hour
- Ceramic water tank 3 L
- Ceramic drainer
- Ceramic cup-support
- Designed for water connection
- Extraction stopwatch
- Customizable colors and materials

TECHNICAL CHARACTERISTICS

Net weight	38 Kg
Power (alternating modes)	1400 W
Power (combined mode)	2600 W
Frequency	50-60 Hz
Voltage	220-240 V

Size

depth	50 cm
width	40 cm
height	45 cm
